# WEATHER OF CONCERN

## Weather of Concern

- Heavy precipitation is possible by midweek with renewed flooding concerns as the wet pattern could extend into the weekend.

## **Active Weather Warnings, Watches and Advisories by County:**

[http://www.wrh.noaa.gov/sto/brief/wwa\\_bc\\_cal.php](http://www.wrh.noaa.gov/sto/brief/wwa_bc_cal.php)

## **WEATHER SYNOPSIS BY REGION**

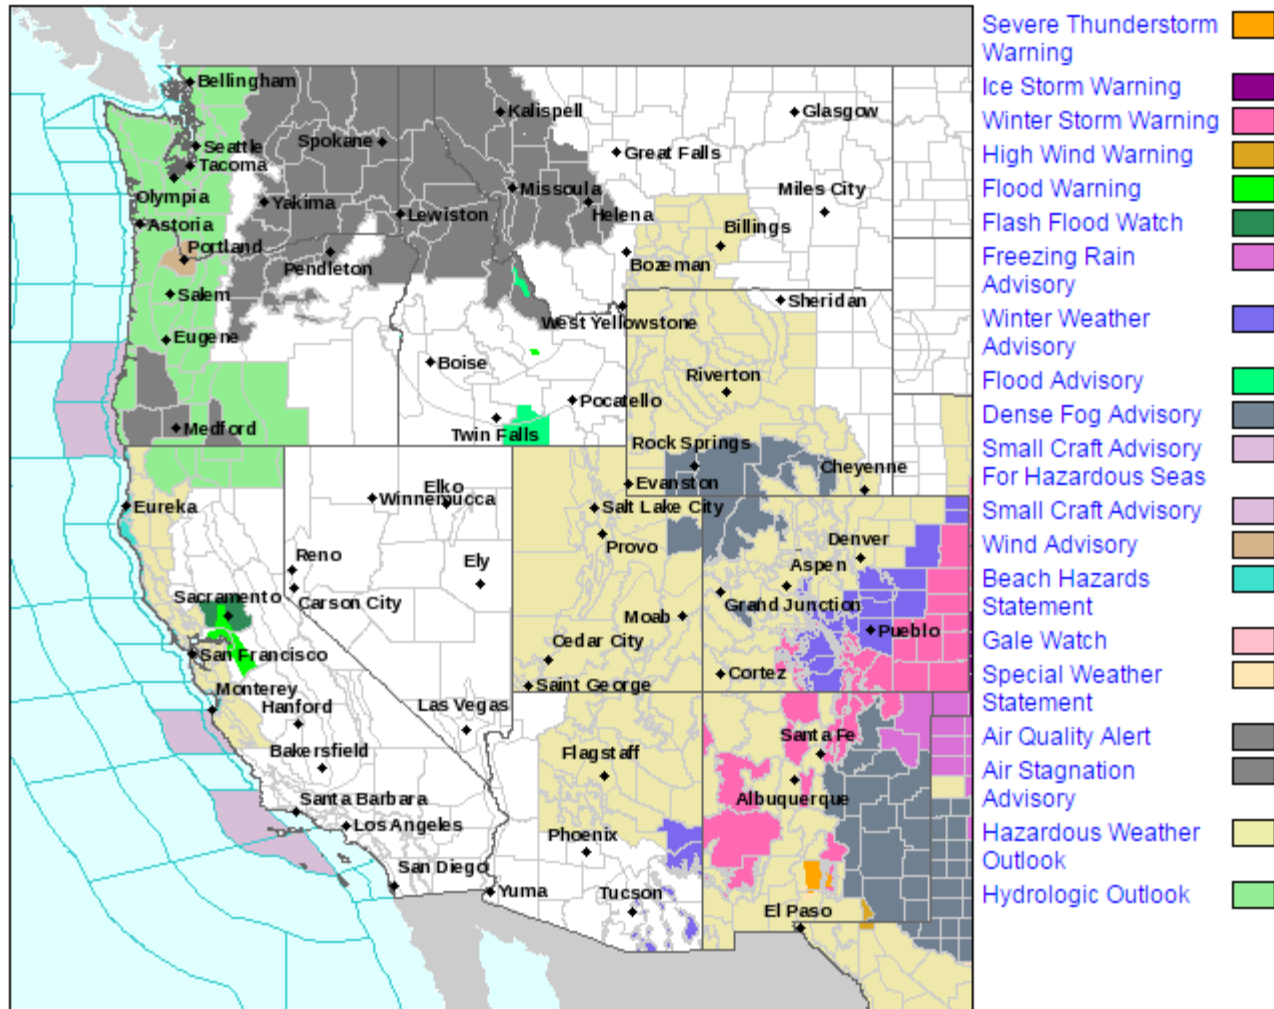

### **NORTHERN CALIFORNIA**

Dry weather is expected through Monday as high pressure moves over the region. On Tuesday, the first in the next series of wet Pacific storm systems will reach the coast with light to moderate rain and gusty Southeast to Southwest winds. Snow levels will be 5000-7000 feet Tuesday night and Wednesday as heavier precipitation and strong gusty winds spread throughout the region. Snow levels will fall by 2000 feet or so on Thursday as colder air moves in. Wet unsettled weather is expected to continue on and off for several days beyond that.

### **SOUTHERN CALIFORNIA**

Today, northeast winds of 15-25 mph with occasionally higher gusts will be possible over Southern California. Temperatures will be 3-5 degrees warmer with skies turning mostly sunny. A weak disturbance is expected to quickly drop southward, which will lead to an increase in clouds and temperatures turning a bit cooler Sunday. Early next week, a ridge is expected to build over the southern half of the state, leading to a slow warming trend. Look for highs to return to near normal readings by Tuesday and Wednesday with sunny skies and light winds overall. Another significant storm system may take aim at the state Wednesday evening into Thursday. At this time, widespread rainfall in excess of 1-2" inches appears likely with this system. A weak system may quickly follow next Friday. Drier weather may return to the region by next Sunday.
